Data from April 15, 2020 Data and graphs that can be found on the Florida Health COVID19 website. [Report Link](#)

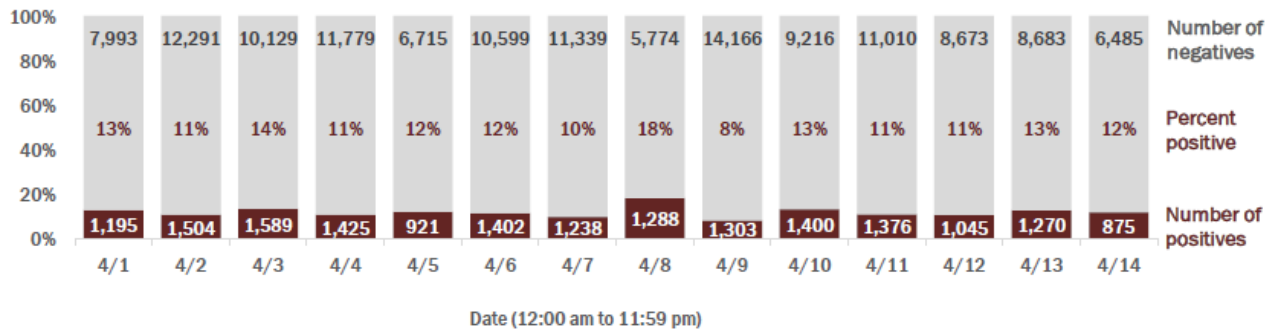

Cases confirmed in Florida residents per day for the past 2 weeks

Number and percent of positive labs

The percent of positive results ranged from 8% to 18% over the past 2 weeks and was 12% yesterday.

These counts include the number of people for whom the department received laboratory results by day. People tested on multiple days will be included for each day a new result was received. A person is only counted once for each day they are tested, regardless of whether multiple specimens are tested or multiple results are received. If a person has a positive specimen and a negative specimen in the same day, only the positive result is counted.
