

COVID-19 SITUATION REPORT # 53

CHAMP ♦ North Central ♦ Northeast Florida Healthcare Coalitions

Wednesday, June 24, 2020

Current COVID-19 NUMBERS BY COUNTY (6/24@ 4:00 pm)			
	Total Cases Residents/Non-Residents	Hospitalizations* Residents/Non-Residents	Deaths
Alachua	807 (784/23)	90/5	11
Baker	42	12/0	4
Bradford	69	13/0	2
Clay	523 (520/3)	101/0	33
Columbia	243 (241/2)	20/0	3
Dixie	62	10	3
Duval	3,419 (3330/89)	325/11	62
Flagler	250 (242/8)	28/2	5
Gilchrist	88	0	0
Hamilton	315 (312/3)	9	2
Lafayette	20	2	0
Levy	154	11	1
Marion	467 (462/5)	57	10
Nassau	128 (120/8)	17/0	1
Putnam	261	29	6
St. Johns	48 (536/12)	55/3	7
Suwannee	349 (41/8)	47/0	18
Union	44	9	2
Statewide	109,014 (106,743)	13,574	3,281

Current COVID-19 TESTING BY COUNTY (6/24@ 4:00 pm)			
	Total Tested	Total Positive	Positive Rate
Alachua	36,374	807	2.2%
Baker	1,557	42	2.7%
Bradford	2,292	69	3%
Clay	15,020	523	3.5%
Columbia	5,368	243	4.5%
Dixie	1,308	62	4.7%
Duval	84,498	3,419	4%
Flagler	7,356	250	3.4%
Gilchrist	2,177	88	4%
Hamilton	2,575	315	12.2%
Lafayette	460	20	4.3%
Levy	2,950	154	5.2%
Marion	21,319	467	2.2%
Nassau	6,052	128	2.1%
Putnam	5,493	261	4.8%
St. Johns	17,102	548	3.2%
Suwannee	3,454	349	10.1%
Union	2,139	44	2.1%
Statewide	1,669,440	109,014	6.5%

FDOH updates data daily at a 11:00 am *Hospitalization includes persons that may no longer be hospitalized.

Regional COVID-19 Isolation Centers

https://ahca.myflorida.com/covid-19_inf.shtml

What are COVID-19 Isolation Facilities?

COVID-19 Isolation Facilities are required to have a full facility or a designated isolation area that is used exclusively to serve medically stable COVID-19 positive patients who require nursing facility level of care and who lack an appropriate discharge setting while recovering from COVID-19 to COVID-19 Isolation Centers. The Centers may accept patients with any type of insurance and patients who are uninsured.

Who can discharge patients to COVID-19 Isolation Centers?

Hospitals, nursing facilities, and assisted living facilities can request to discharge patients to COVID-19 Isolation Centers. The discharging facility will contact, and work directly with, the isolation facility to coordinate the transfer. The isolation facilities have agreed to serve as a regional resource to receive these patients.

Where are the facilities near our region? How do I contact them to discuss potential discharge?

Duval County— Dolphin Pointe • 146 designated beds • Geoff Fraser Gfraser@clearchoicehc.com (321) 288-0171

Leon County— PruittHealth SouthWood • 64 designated beds • Jeff Bell scobell@pruitthealth.com (678) 533-6300

After Action Review

Starting your After Action Review Process for COVID-19

Steps your facility/organization should take now, while the COVID response is still ongoing:

1. Designate a person to lead your organization through the AAR process. If not a senior leader, then someone that has access to the senior leadership. Identify key individuals that will need to be involved and engage them now.
2. Develop an incident timeline. This involves listing your organization's actions in time order, to see what happened when. Consider including major events that impacted your organization as well, such as stay-at-home orders or a ban on elective procedures. Here are two examples from the [WHO](#) (COVID-19) and [CDC](#) (SARS).
3. Take detailed notes on the operational and leadership actions taken during each time segment. Remember, observations are much more reliable than memories. Have key staff keep track of their response actions, outcomes and challenges throughout the response. Some organizations use the [ICS-214 form](#), but any uniform process established to capture activities is important.
4. Develop a process to collect this information regularly. One recommendation is to collect the ICS-214s at the staff sign-out/check-out station. This information will be invaluable to your leadership as you begin to change process, policies and organizational culture.
5. Consider conducting frequent, but brief, AAR sessions. This is a long response and things change over time. In these brief sessions discuss things that are going well and areas that may need improvement. Take detailed notes during these sessions. These brief AAR sessions may assist in making incremental changes to processes or large policy changes to improve the ongoing response.
6. Document everything! Remember this important rule: If it is not written down, then it didn't happen.

Analyzing Response and Root Cause Data. This can be done in phases or at the end of the response.

Next in the After Action Review (AAR) process, is evaluating all the information collected during the response, either by phase or the entire event, using the incident timeline.

As you review the information collected, for the actions taken during the response, compare the organization's actual performance with the current processes, policies, goals and objectives.

During this analysis, identify the actions that worked well and those that may require improvement. For actions that did not work well, a root cause analysis may assist in determining the underlying reason behind an identified issue or challenge. When conducting a root-cause analysis, you are attempting to trace the origin of each event/issue back to earlier events and their respective causes. It requires asking "why", multiple times, to determine the root cause of an issue or problem. This is not a foreign concept in healthcare, as it is often used in patient safety studies. So if you haven't involved your patient safety folks in the AAR process, now is a great time to do so!

Region 3 Alliance After Action Report-Improvement Plan Template (for non-hospital partners)

[Healthcare Facility \(non hospital\) – After Action Report Improvement Plan Template \(MS Word Template\)](#)

Your organization may use this template to document the response strengths, areas for improvement and the organization's plan for making identified improvements.
